

At-a-glance

Transform with performance-based IT solutions

Information Technology Enterprise Solutions-2 Services (ITES-2S)

Resolve complex IT issues using a performance-based, ID/IQ contract to acquire innovative, standardized solutions and services.

Insights

- You need to modernize your technology.
- The ITES-2S contract enables it—with no fees.
- Team HP partners with the U.S. Army to deliver ITES-2S solutions.

You've been tasked with acquiring cost-effective business solutions and better-managed IT assets enterprise-wide, via streamlined, performance-based contracting. It's part of the U.S. Army's Transformation Modernization Plan—the most massive transformation in its 230-year history—to retain the best current capabilities, while developing new and improved interoperable functionality. This modernization requires a comprehensive and balanced approach.

To help the Army, Department of Defense, and other federal government agencies meet this goal, innovative, standardized, turnkey solutions and services can be purchased using the ITES-2S contract. This contract has zero fees, so you don't have to use scarce IT funds to pay for business solutions development. The goal is to support enterprise IT and business needs, and enhance centralized IT operations and management.

Partner with us

HP partners with the Army and the federal government agencies to deliver ITES-2S solutions. We deliver state-of-the-art business services through an ITES-2S team that combines exceptional breadth and depth with unique strengths, and incorporates extensive performance-based and indefinite delivery/indefinite quantity (ID/IQ) task order management experience. Leveraging the expertise of a large number of small businesses and the creative and business synergies of our HP Agility Alliance partnerships, we support tasks in all nine ITES-2S functional areas:

- Business process reengineering (BPR)
- Information systems security
- Information assurance

- Information technology services
- Enterprise design, integration, and consolidation
- Education/training
- Program/project management
- Systems operation and maintenance
- Network support

Team HP has offerings that support the above-mentioned areas and is available on the Army Computer Hardware, Enterprise Software and Solutions (CHES) IT e-mart website. CHES provides information on IT contracts and blanket purchase agreements. Go to CHES to check on guidance, find vendors lists, peruse offerings, view prices, or request quotes.

Offerings can be implemented or delivered as enterprise solutions or in a decentralized manner to leverage decentralized IT funding.

Achieve your goals

HP is one of the world's largest ID/IQ and performance-based contractors, experienced in delivering billions of dollars' worth of solutions and services through individual task orders while managing numerous subcontractors. Together, with our Team HP partners, we can help you achieve these goals and objectives:

- Acquire innovative, standardized solutions and services that support Army enterprise IT and business needs, and enhance centralized IT operations and management
- Meet command/organization-level IT requirements for current, competitively priced technology solutions and services

Work with the best

HP routinely delivers its solutions via performance-based and ID/IQ contracts, and has managed thousands of subcontractors on hundreds of task orders. Our innovative approach is unsurpassed in delivering state-of-the-art business services.

The HP Team brings proven experience and capabilities delivering end-to-end IT solutions across all ITES-2S requirement areas. Our architecture and process experience—including Department of Defense Architecture Framework, Federal Enterprise Architecture, IT Infrastructure Library, and Capability Maturity Model Integrated—provides interoperable solutions with a common lexicon.
