

Tec-Masters

Where Technology Meets Imagination...What a Concept!

John Broyles

John Broyles, Director of Systems and Logistics for Tec-Masters, Inc., states, "Our guiding principle is the fact that quality is the key to customer satisfaction." Tec-Masters' long, successful history with its customers is directly related to the quality and versatility of Tec-Masters' personnel. Broyles continues, "Many of our employees have been here for 20 years and contributed to numerous programs. This rare

collection of entrepreneurs established our relationships with clients, which in time led to our repeat wins on many contracts and the expansion of our services to those clients."

Some of Tec-Masters, Inc. longtime customers include NASA, Fires Center of Excellence, Terminal High Altitude Area Defense (THAAD), and Multiple Launch Rocket System/Precision Fires Rocket & Missile Systems (MLRS/PFRMS).

Tec-Masters has certifications/accreditation for ISO 9001:2008, Six Sigma and CMMI-Level III. "We are organized, effective and understand how to do more with less, which the DoD is pushing," says Broyles.

A few examples of Tec-Masters' expansion includes work for the U.S. Army PEOs in Information Assurance, Information Technology, and Management Information Systems; Creative Multimedia applications for the U.S. Army Corp of Engineers and Navy; and military and industrial training with web-based and live platforms. Broyles comments, "With our continued growth, our goal is still to supply the best customer satisfaction. Tec-Masters' personnel have a vast array of experience in numerous disciplines. Our portfolio of skills and capabilities will support client satisfaction for years to come." ■
