

FOR IMMEDIATE RELEASE

Tec-Masters, Inc. Named 2011 Top Simulation & Training Company

Huntsville, Alabama: September 8, 2011 – *Military Training Technology* (www.mt2-kmi.com) proudly recognized the 2011 top performers in the Simulation & Training industry; companies making a significant impact across the spectrum of technologies and services. Those named deliver products and services that allow U.S. Airmen, Marines, Sailors, Soldiers and Coast Guardsmen to train and rehearse for missions in theater, or to prepare for deployment at home station. Tec-Masters, Inc. (TMI) has demonstrated expertise in Engineering, Constructive Simulation, and Research and Development and has been named a 2011 Top Simulation and Training Company.

TMI personnel developed key Simulation and Training products for the Fires Center of Excellence Fires Battle Lab, PEO STRI, and the Missile Defense Agency. TMI performs a wide breadth of training and simulation activities in all simulation domains. TMI designs and fabricates components used in integrating live vehicles and players into the live simulation domain. TMI also integrates live command and control devices with Human In The Loop (HITL) simulations and constructive simulations for both training and experimentation. TMI software engineers and subject matter experts are keys to a successful Fires Battle Lab simulation based experimentation program.

“Our sole mission is to equip the Warfighter with the best technology and training possible,” stated Bill Millspaugh, Director Simulation Technology, TMI Lawton, Oklahoma. “We are honored to be part of training and providing our soldiers with the necessary skills to do their jobs effectively and come home safely. It’s our privilege to receive this recognition and we are committed to continued excellence in everything we provide to the Warfighter.”

TMI and the Fires Battle Lab received the “2010 Army Modeling & Simulation Award Army-wide Team Experimentation” at the December 2010 Interservice/Industry Training, Simulation, and Education Conference (I/ITSEC) in Orlando, FL. This is the world’s largest Modeling, Simulation and Training Conference. TMI executes technically challenging research and development activities in the integration of Hardware-In-The-Loop (HWIL) simulation and stimulation devices such as the Radar Digital Signal Injection System (RDSIS) and the Advanced Terminal High Altitude Air Defense (THAAD) driver.

TMI has successfully worked in the Defense Industry for over 20 years. Headquartered in Huntsville, Alabama, TMI provides innovative technical solutions for Defense, Federal and Commercial customers worldwide, specializing in: Mission Support; System Integration; Maintenance; Training; Creative Multimedia; Logistics; Information Technology; Software Development; and Customized Engineering & Manufacturing.
